- **Tools & Utilities:** Git, VS Code.

## Educational Qualifications

- **Bachelor Of Technology**, in 2023 with 6.85 CGPA.
- **Diploma**, in 2020 with **74%**
- **High School**, in 2017 with 54%.

## Experience

- Worked as a frontend developer in Satschel India

## Key skills

- Technical Proficiency
- Adaptability to new technologies
- Problem-solving and Analytical Skills
- Communication and Teamwork

## Professional Experience

**Organization:** Satschel India (Compliance Innovation) Bangalore.

1. Contributed to maintaining and debugging code to ensure high-quality, scalable software solutions.
2. Implemented best practices in code structure and naming conventions, ensuring clean and maintainable code.
3. Worked on numerous UI fixes, Including making the login and signup pages responsive, improving the overall user experience.
4. Resolved bugs and optimized features, improving product stability and functionality.
5. Developed phone number validation based on the country code, ensuring accurate input formatting and validation logic.
6. Designed and implemented new features, such as the BCC (Blind Carbon Copy) button for emails, adding essential functionality to the email system.
7. Worked with WebSocket to integrate QR code scanning enabling real-time data sharing.
8. Collaborated with cross-functional teams to deliver high-quality features in a fast-paced development environment.

## Personal Project

I have worked on diverse projects, including a portfolio website to showcase my skills and achievements, an e-commerce platform with features like product listing, filtering, and cart management, and a home-service booking application and responsive design. Additionally, I have developed smaller projects such as a to-do list application and reusable components like responsive application forms with authentication, incorporating real-time phone number validation and secure submissions.

These projects allowed me to enhance my expertise in React.js, JavaScript, and creating intuitive, user-friendly interfaces.
